MUHAMMED SHAHABAS V V

Python Full Stack Developer

muhammedshahabasvv@gmail.com | +91 8848045691 | Kochi, Kerala, India | LinkedIn

Professional Summary

Python Full Stack Developer with knowledge of Python, Django, HTML, CSS, JavaScript, Bootstrap, and MySQL. Practical exposure to full-stack development, database operations, debugging, and testing through internship experience and academic project work. Familiar with machine learning and natural language processing concepts. Eager to contribute to software development teams by building reliable, responsive, and user-friendly applications.

Technical Skills

Programming Languages: Python, C, C++
Web Technologies: HTML, CSS, JavaScript, Bootstrap
Framework: Django
Databases: MySQL
Tools and Practices: Git, Debugging, Testing
Professional Skills: Problem Solving, Communication, Quick Learning

Professional Experience

Python Full Stack Developer Intern **2026 – Present**
Foximize Technologies Kochi, India

- Assist in developing and maintaining full-stack web applications using Python and Django.
- Contribute to backend functionality and API development using Python-based technologies.
- Develop responsive user interfaces using HTML, CSS, JavaScript, and Bootstrap.
- Work with relational databases, including MySQL and PostgreSQL, for data storage and retrieval.
- Use Git for version control and participate in debugging, testing, code reviews, and application improvements.
- Participate in team collaboration and Agile development activities.

Python Programming and Data Science Intern **May 2025 – June 2025**
I Net Infotech Kochi, Kerala, India

- Completed internship training focused on Python programming and Data Science.
- Gained practical exposure to data analysis and introductory machine learning concepts using datasets.

Project

Detecting AI and Human Generated Text

- Developed a text classification system to distinguish between human-written and AI-generated content.
- Worked with a Kaggle dataset containing over 487,000 text samples and applied under-sampling to create a balanced dataset of 10,000 samples per class.
- Applied feature engineering using linguistic characteristics and semantic representations with Doc2Vec.
- Evaluated machine learning models and achieved up to 99% accuracy with Support Vector Machine (SVM) during project testing.
- Focused on text authenticity analysis and classification performance.

Education

Bachelor of Computer Applications (BCA) **2023 – 2026**
Kannur University

Higher Secondary Education – Humanities with Computer Application **2021 – 2023**
Kerala Board of Higher Secondary Education, Kannur

Languages

English, Malayalam, Tamil
